Daphné Augier

Software Development Engineer in Test (SDET) & Full-Stack Developer

Montréal, Canada · +1 (514) 224-7342 · daphne.augier@gmail.com · daphneaugier.com · linkedin.com/in/daphneaugier · github.com/daphneaugier

SUMMARY

Software Development Engineer in Test with a B.Eng. in Software Engineering and 5+ years across QA/SDET, full-stack development, and UI/UX design. I write Python test automation (pytest, Playwright), build internal tools, and validate backend APIs and web/mobile products throughout the full software lifecycle. I bring a cross-disciplinary background — software engineering degree, UX design experience, and a creative practice — that lets me catch functional issues and product gaps that single-track profiles miss. Passionate about quality engineering, creative software, and building things that work reliably for real users.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Dart, Kotlin, HTML, CSS

QA/SDET: Test plans, test cases, E2E, manual & automated, SQA methodologies, SDLC

Design: Figma, Miro, WCAG accessibility, UX research & prototyping

Automation: pytest, Playwright, UI automation, API/backend testing

Platforms: Docker, CI/CD, GCP, Firebase, REST APIs, mobile (Flutter iOS/Android)

Quality craft: Bug detection, isolation, reproduction, regression, release sign-off

EXPERIENCE

Software Development Engineer in Test (SDET)

Aug 2025 – Present

GameAddik (GameRebellion) · Montréal, Canada

- Plan, design, write, maintain, and execute E2E test cases manually and via Python (pytest) + Playwright for a large-scale consumer web app (400K+ games).
- Program in Python to prototype internal test tools, including a React + API workflow for functional execution, result history, UAT, and production sign-off.
- Test mobile-class and desktop web apps plus backend/APIs — REST contracts, data validation, functional, integration, and regression.
- Validate GenAI/AI-adjacent features with meticulous bug isolation; first dedicated quality hire, setting process improvements and release bars each sprint.
- Use AI-powered tools (Cursor) to accelerate test script development; run suites in CI/CD across Dev, Staging, and Production.

Full-Stack Developer & UX Engineer, Creative Applications

Jan 2024 – Aug 2025

Freelance · Montréal, Canada

- Shipped creative digital products for makers and storytellers — Divorce.fm (music radio + CMS) and Caché SF (French bistro website) — using JavaScript, PHP/Laravel, and APIs.
- Acted as designer and developer: brand identity, responsive front ends, and backend systems clients can manage autonomously post-handoff.

- Applied functional testing and regression checks throughout development for reliable delivery across mobile and desktop.

Co-Founder & Chief of Product, Creator Marketplace (Mobile) Jan 2023 – Aug 2024

TheCollectible · Paris, France (remote)

- Led product, UX, and usability testing for a creator art marketplace; shipped Flutter/Dart mobile app targeting iOS and Android on GCP/Firebase.
- Coordinated multi-functional test and delivery efforts as Scrum Master; communicated priorities, progress, and risk to technical and non-technical partners.

UX/UI Designer Nov 2022 – Jan 2024

Solotech Inc. · Montréal, Canada

- Turned requirements into Figma/Miro prototypes and WCAG-accessible interfaces; partnered with developers on pre-deployment quality.

Software Developer Nov 2021 – Nov 2022

MindGeek (now Aylo) · Montréal, Canada

- Wrote and maintained production CMS features for the Trust & Safety branch using Symfony; collaborated with Product and QA on bug isolation and regression through Agile sprints.

Web Designer & Developer Aug 2019 – Sep 2022

Freelance · Montréal, Canada

- Built and tested Camp'art (e-commerce + reservation system) and a custom Discourse plugin (Ruby, JavaScript) for a psychological help forum with functional test cases before handoff.

EDUCATION & CREATIVE PRACTICE

Bachelor of Engineering, Software Engineering Sep 2016 – Jun 2021

Concordia University · Montréal, Canada

Campus Map mobile app (Kotlin/JUnit) · SCM auditing system: Scrum Master for 10, Python/Angular/TypeScript · Creative practice: oil/watercolor painting, classical piano (13+ years), film photography.
